NURAZZO

WHY CHOOSE NURAZZO TILE

- Nurazzo Tile is a true epoxy precast Terrazzo tile
- Dimensionally stable.... Will not shrink or warp
- Stone and glass chips Will not pop out
- Compressive strength of 10,000 psi - this is *significantly* higher than other precast Terrazzo tiles
- Brighter colors..... Epoxy allows for more vibrant colors
- Up to 70% post-consumer recycled product
- Ease of installation and maintenance
- Affordable alternative to pour-in-place terrazzo
- Unlimited color options
- State of the art manufacturing facility
- 20 year warranty
- Contributes to LEED projects
- Available in various sizes

“

Majestik's superior knowledge and technical support is second to none and is the blue-chip choice to install Nurazzo tile.

Toby Steinbeck
Principal, Nurazzo®

OUR EXPERIENCE

Majestik Surface Corporation has years of experience restoring and maintaining marble, granite, terrazzo, concrete, limestone and ceramic.

Our Staff has serviced over 10 million square feet of flooring located in hospitals, retail outlets, schools, churches, convention centers, property management facilities and many other markets.

We provide solutions for any type of stone surface problem. Our expertise and professional craftsmanship can provide consultation on jobs large and small. Finishing, normal wear and tear, and water damage are a few of the common problems that we encounter.

Our craftsmen have been trained with the skills of a time-honored tradition. Stone polishing and marble polishing are an art to us. We take pride in using specialty tools and polishers. We understand how stone reacts in various environments so we customize every polishing job to your situation and to your liking. Our stone polishing jobs are just as important as our marble and stone floor restoration projects.

UNIQUE CLEANING STRATEGY

The Turbo tool has been designed to clean porous and non porous surfaces that are considered hard and include stone, ceramic, porcelain, quarry and other clay tiles, vinyls of all kinds, engineered stone and concrete like terrazzo, many others can be included.

Our cleaning strategy is unique. Instead of dissolving dirt, grime, and grease by scrubbing, mopping and spreading the grime around, our tools use the heat, pressure and suction from the truck mount to emulsify, remove and rinse almost instantly, as fast as one can stroke the tool. All the grime is vacuumed away for proper disposal.
